PROJECTS AND RESEARCH

Quark – Interactive Real Time Video Manipulation and Audio Playback Control

Nov. 2015

- Created a multiplayer Apple TV application where each player is able to manipulate video in real time with different iPhone gestures. App also allows for control of audio stream playback by scanning the corresponding QR codes
- Used the Core Image framework and Swift for iOS to create versatile image filters which I applied to individual video frames

Sonder – “Tap into the World Around You”

Oct. 2015

- Implemented the front-end UI of a social media platform which crowdsources anonymous compliments from users creating a sphere of positivity using Objective-C for iOS

DARMS: Dynamic Aviation Risk Management System (Teamcore Research Group)

Sept. 2015 – Present

- Applying input game theory algorithms in Unity and Java for a large-scale, robust 3D simulation of current TSA DARMS airport protection measures
